Fire Protection Association Australia presents

AS ISO 14520 - The new Australian Standard for the design, installation and commissioning of Gaseous fire-extinguishing systems

The Presentations

Leading industry experts will provide an overview on AS ISO 14520, including system design, installation and commissioning as well as covering the relevant maintenance requirements from AS 1851.

A session detailing the regulatory, licensing and Code of Practice requirements associated with the use of ODS (Ozone Depleting Substance) and SGG (Synthetic Greenhouse Gas) fire extinguishing agents will also be provided, followed by a question and answer session.
