FPA Australia's eLearning Resource Receives Major Award

FPA Australia's eLearning CD PRMPFES06 *Prepare for Installation and Servicing Operations* received an award for best entry in the Accredited eLearning Vocational Education and Training (VET) sector during last night's eLearning Industry Excellence Awards.

The Industry Excellence Awards are a prestigious annual recognition of innovation and achievement in the eLearning industry.

Geoff Warren, Training and Research Consultant says, "FPA Australia's entry competed with major TAFEs, Registered Training Organisations and specialist providers across the eLearning industry. It's great validation of our work to have our learning resources ranked so highly by other eLearning professionals."

Judges commented that, "A wide range of on-screen display and interaction techniques are used, closely matching the content, the outcome and the method used. Visuals are accurate, simple and clear."

The CD forms the main component of learning materials for the unit PRMPFES06 *Prepare for Installation and Servicing Operations* and is part of the Asset Maintenance (Fire Protection Equipment) Training Package, as well as a requirement for certain Extinguishing Agent Handling Licences.

Scott Williams, CEO of FPA Australia says, "We are delighted to receive this award. FPA Australia, and the fire protection industry are fortunate to have benefitted from the expertise of our Learning and Development department."

For more information on training opportunities through FPA Australia, contact our Learning and Development department on 1300 731 922 or email training@fpaa.com.au.
